

# Land-to-Sea Shaking Studies Workshop

Unlocking the full potential of subaqueous  
paleoseismology at active plate boundaries

Image: Paliwan Formation at Taiyuan Basin, E. Taiwan

## WHAT?

2-day workshop, 1-day field excursion, 1-day proposal writing

[More details on the workshop website here.](#)

## WHEN?

21-24 October 2025

## WHERE?

National Taiwan University, Taipei

## WHO?

We aim to gather international experts ranging from marine seismologists to limnologists, and students to senior scientists, to discuss and develop future proposals aimed at tracking earthquake-shaking across land-to-sea transects to enhance fundamental understanding of rupture processes, earthquake recurrence and associated hazards at active plate boundaries.

Keynotes from **Laura Wallace** (GEOMAR), **Lydia Staisch** (USGS), **Jasper Moernaut** (UIBK), **Hajime Naruse** (Kyoto Uni.)

International steering committee:

**Charlotte Pizer**, UIBK, Innsbruck, Austria

**Jamie Howarth**, VUW, New Zealand

**Ken Ikehara**, AIST, Japan

**Cecilia McHugh**, Queens University of New York, US

**Jyh-Jaan Steven Huang**, NTU Taipei, Taiwan (local host)

**Michael Strasser**, UIBK, Innsbruck, Austria

**Katleen Wils**, Ghent University, Belgium

**Ryo Nakanishi**, Kyoto University, Japan

**Chloe Seibert**, University of Minnesota, US

**Tzu-Ting Chen**, NTU Taipei, Taiwan
